Results > Delivered

We take a practical and proactive approach to providing civil services within industrial, mining and remote environments that assist in maximising site efficiencies.

By continually delivering and collaborating on project goals we have partnered with Glencore since 2009 at their Oaky Creek Mine in Tieri, Central Queensland.

By ensuring safe and efficient working practices, we form an integral part of the mine's resources management. We understand the critical importance of time efficiencies and competencies in delivering results.

We will continue to develop processes that overcome the challenges faced in successfully working within the mining environment.

Key Deliverables:

- Tailings and Reject Dam excavations
- Land Rehabilitation
- Dredging
- Dry mining through excavation and haulage
- Construction of Life of Mine assets
- Pipeline excavation and installation for water and gas services
- Pad excavation for drilling to service underground
- On site haulage and plant mobilisation
- Levee and dam wall constructions
- Construction and maintenance of haulage and mining services roads
- Drone and survey pick-ups of land and volumes
